

SIMPLY CLEVER

# The new ŠkodaRoomster

Some views are known to surprise. Others are known to inspire. Some are best enjoyed alone. Others are worth sharing with your loved ones. That's why the new Škoda Roomster is big enough for a family and all its scenic adventures.

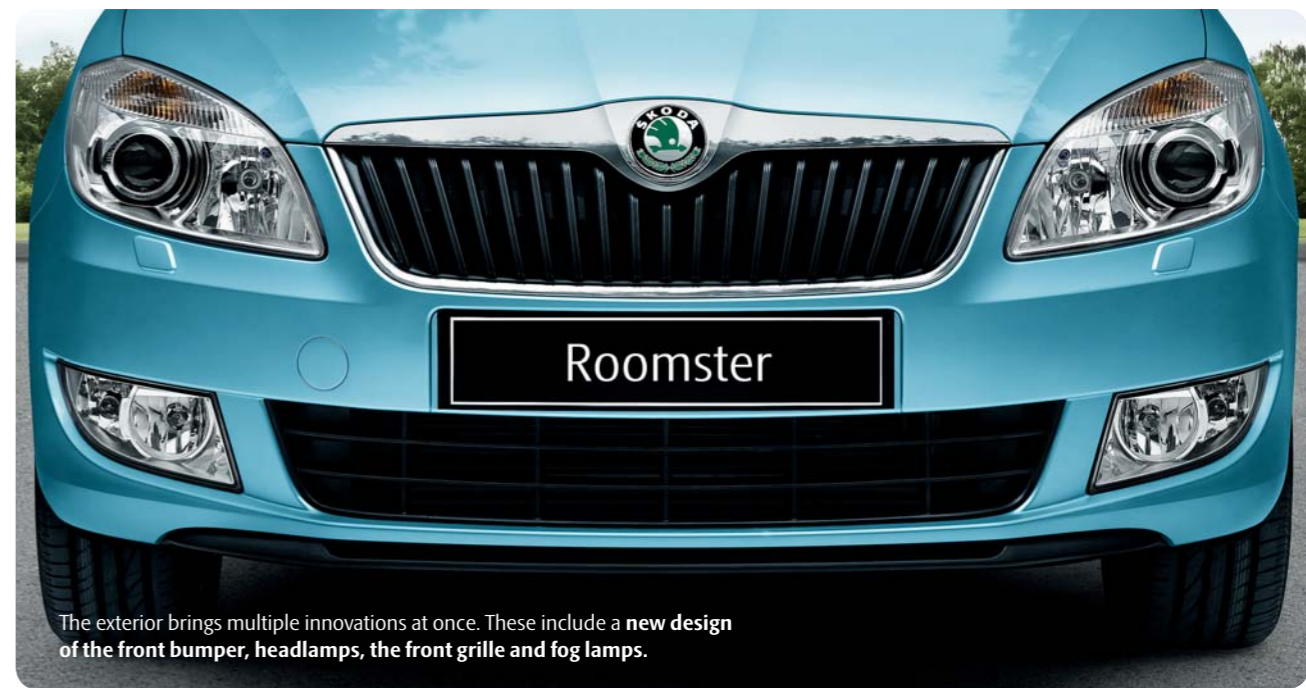

There are some views we discover by chance. There are others we often return to. Some provoke a smile. Others provoke our imagination. Some sights open our eyes. And then there are those which even open our minds.

Some views are infinite. They travel as far as we can see. Sometimes even further than our imagination. But even the most endless scenes can be further appreciated when witnessed from the elevation of higher rear seats.

The characteristic elements of the Roomster, such as the **integrated rear door handles**, or extraordinarily **large rear side windows**, also come with the new model. The offer of a **roof railing in an exclusive black-silver design** is a novelty.

The exterior brings multiple innovations at once. These include a **new design of the front bumper, headlamps, the front grille and fog lamps**.

A great view is one that can be enjoyed without interruption. When your eyes are free to roll around in amazement. These sights are all around us, and sometimes above us - waiting to be discovered through the big open windows and the panoramic roof of the new Škoda Roomster.

The 0.82m<sup>2</sup> **panoramic roof** amplifies the feeling of the car's space. The laminated glass roof prevents excessive heating of the interior while protecting the passengers from UV radiation.

You can adjust the car's **interior** to your current transport needs at any time. All Roomster models have rear seats equipped with the **VarioFlex rear seating system**. The system consists of 3 separate independently movable rear seats (see below). By removing the seats you can obtain a **storage area with a capacity of 1,810 litres**.

With the seats in their base positions, the luggage compartment capacity is **480 to 560 litres**. A **set of nets** may add to the car's practicality.

All of the **rear seats** may be **removed** together or individually as required. You can **tilt** the backrests of the rear seats toward the sitting sections. If you remove the middle seat, you can **shift** both side seats 110 mm towards the centre.

You can shift the **rear side seats** 80 mm forward and 70 mm backward from their base positions. The backrests of the seats can be positioned as needed.

Some views begin where the road ends. They stretch beyond what maps can reveal.  
Discover them in a journey that's as unique as the new Škoda Roomster Scout.  
It's a car that can help you escape the city but can also bring you back.

The **rear bumper spoiler** and the **silver lower cover** give the car rear a robust appearance.

With the integrated **interior bicycle holder**, you can comfortably transport 2 bicycles.

**Plastic covers** on the bumpers, sills and lower parts of the doors emphasise the car's uniqueness, along with the **alloy wheels** especially developed for the Scout: the 6.5J x 16" **Arktos** (see photo) and the 7.0J x 17" **Kentaur**.

The **new Škoda Roomster Scout** is the ideal partner for an active lifestyle. It will fascinate you with its attractive cross-country vehicle appearance, comfortable equipment and variable interior space. You can find more information on equipment options, technical parameters and the engines on offer from your authorised Škoda partner.

The **Scout interior** is designed in a grey/black colour with an Onyx/Onyx or Onyx/Silvergrey dashboard. Options also include the **Floss** interior (leather/artificial leather/fabric) or the **Pulse** interior with sports front seats.

The **rear seats with the VarioFlex system** will allow you to rearrange the interior according to your current needs.

Thanks to **noble steel foot pedal covers** and **removable woven carpets** with grey stitching, the interior evokes a feeling of comfort and cosiness.

With our **Colour Line** programme, you have the opportunity of enhancing the unconventional concept of the Roomster, as well as emphasising your uniqueness. You can choose from several roof colour versions and self-adhesive foil in the same tint. The combinations offered are shown in the overview of external body paint colours on the last page.

The vehicle may also be equipped with **tilting halogen projector headlamps** for the enhancement of corner driving safety.

The **fog lamps** with the **daytime running lights** are also offered in a version with the **Corner function**. This feature automatically switches on either the right or the left fog lamp, depending on the angle of the steering wheel and the activation of the turn indicators, at the maximum speed of 40 km/h.

The standard safety equipment of new Roomster cars includes **mount preparation for two child seats with the Isofix system** including special safety belt anchoring which is an essential part of the **Top Tether child seat**.

If you want to place the child seat on the front passenger seat, you have to equip your car with the **deactivation of a passenger airbag**. Once installed, you can turn off the airbag with a key.

New Roomster cars may be equipped with up to 6 airbags for your protection: **driver and front passenger airbags, front side airbags and head airbags**.

The new **automatic 7-speed DSG transmission** designed exclusively for the 1.2 TSI/77kW engine guarantees comfortable yet dynamic drive with economic fuel consumption.

The highest performance diesel engine developed for the new Roomster is the **1.6 TDI CR DPF/77kW** turbocharged 4-cylinder engine.

You may order additional features, such as **TPM** (Tyre Pressure Monitoring) and **start-up assistant**, supplementing your **ESP** (Electronic Stability Programme) which always includes **ASR** (Anti-Slip Regulation; deactivation button shown on the photo).

The **new engine range** for the new Roomster model responds to the need for **protecting the environment** and the continual **lowering of CO<sub>2</sub> emissions**. The 1.2 TSI petrol engines excel with their flexibility, low noise and economy. Diesel engines, supplied with the common-rail fuel injection system, are noted for their quiet and refined operation and extraordinarily low consumption.

A number of innovations are available in the equipment offer: a new navigation system, new radios and the MDI (Mobile Device Interface). The photo shows the Drops Blue interior.

You control the Amundsen navigation system with a 5" colour touch-screen.

The Swing radio is furnished with a dual antenna and the music CD, CD-MP3 and CD-WMA player.

The MDI (Mobile Device Interface) is represented by a connector allowing (by means of interconnecting cables with terminals for the iPod, Aux-in, or USB) the control of a connected external device through the radio or the Škoda navigation system.

You will appreciate the cruise control, capable of maintaining the preselected speed, during long motorway drives.

The Climatronic air conditioning with electronic regulation manages glass defrosting and demisting.

#### Roomster Active

The Domino black or grey interior with the Onyx/Onyx dashboard.

#### Roomster Comfort

The Chess beige interior with the Onyx/Ivory dashboard or Chess black interior with the Onyx/Onyx dashboard.

#### Roomster (basic equipment version)

The Stone grey or blue interior with the Onyx/Onyx or Onyx/Silvergrey dashboard.

#### Roomster Style

1.6 TDI CR DPF/66 kW	4.7	124
1.6 TDI CR DPF/77 kW	4.7	124

HTP – High Torque Performance  
 TSI – Turbocharged petrol engine with direct fuel injection system  
 TDI – Turbocharged diesel engine with direct fuel injection system  
 DPF – Diesel Particulate Filter  
 (A) – Applies to versions with automatic transmission  
 x – Available during 2010; no data available at the time of printing

For information on the engine offering for the Roomster Scout contact your authorised Škoda partner.

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes (including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
