

Toyota HZJ 79

### **Compact Transglobal Adventure Vehicle**

The Toyota Landcruiser HZJ79 is an extremely strong and reliable long-term off-road vehicle, which is legendary for its performance the world over. Combined with the bimobil high quality cabin build, this makes the EX280 the ultimate compact expedition vehicle, which can easily be serviced or repaired anywhere in the world, and provides comfort and versatility for two persons.

The bimobil EX280's specially adapted engine is Euro V compliant to meet European Emissions Standards, while enabling the added equipment to be removed easily for use outside of Europe.

The EX280 is fully winterised for all seasons and conditions, performing superbly in the most hostile environments. It benefits from the choice

of two layout options. The spacious 2L layout can be fitted with a large optional tailgate so that you can enjoy alfresco dining. While layout 3 will seat four people comfortably when you have visitors, and has additional storage space in the garage under the forward seating area. On both layout options the seating area can be converted easily into an extra bed.

Both layouts have a large 1.5m by 2m Luton bed with Froli spring system, compressor refrigerator, diesel-fired heating, kitchen, shower, WC, wardrobe and lots of storage space, making these units fully equipped and self-sufficient for long term overland travel. As with all bimobils there is a large optional accessories list from which to choose from, to tailor this vehicle to meet your own travel requirements.
