

Comfortable layout Great off-road capability

The Iveco 4x4 chassis with a powerful Iveco engine, loads of ground clearance, short wheelbase, mechanical differential locks and high and low range gears giving 24 forward and 4 reverse gear ratios, is an excellent vehicle for off-road use.

The firm mounting makes it comfortable to drive on asphalt and dirt tracks as well. The rear of the vehicle encompasses a comfortable 'U' shaped seating area. The dining table slides to enable easy access and can be lowered to bench height to convert the whole seating area into a double bed.

The beds in the Luton are configured longitudinally, so that each occupant can get in and out individually. Easy access steps are folded away when not in use. The ends of both beds extend over extra storage and wardrobe space.

A good-sized bathroom with separate shower is centrally located opposite the well-fitted kitchen, which has a two-burner hob and a stainless steel sink fitted into the mineral-acrylic work top.

The refrigerator is a 12V compressor unit, with excellent cooling at all times.

The whole living area is built on a double floor which offers huge storage possibilities for all your travel and sports equipment.

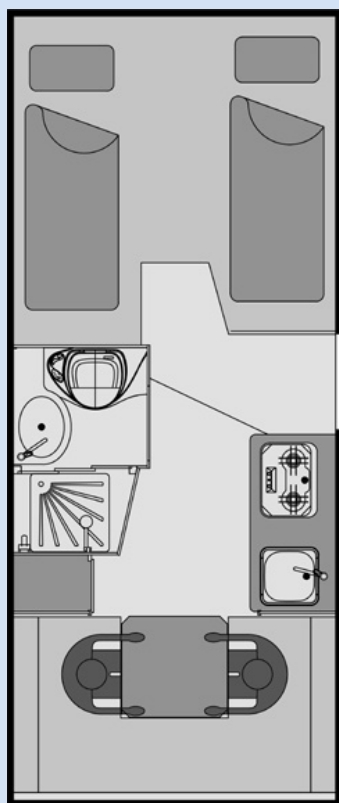

The fresh and waste water tanks are built into the left and right portions of the double floor, heated and insulated against outside cold. The waste water release valve is also in this heated and insulated compartment, while still being accessible from outside.

There is additional extensive storage in ceiling lockers throughout the cabin, and in cupboards and wardrobe.
