DESIGN

Range Rover Evoque. Design that is inspired by the vibrancy and energy that defines the greatest cities on earth. A spirit that belongs to a new generation. Bold and uncompromising. Unique. Original. With an attitude that's got whatever it takes. The future transformed into stunning reality.

With its sporty, dynamic profile Range Rover Evoque creates a new class it can call its own. It offers a new interpretation of classic Range Rover design cues including the signature clamshell bonnet, the floating roof and the prepared-for-anything stance, including short body overhangs both front and rear. There's a new, dramatic rising beltline – a muscular shoulder runs the length of the vehicle – and a unique, distinctly athletic taper to the roofline which is emphasised by the black pillars. It is unmistakably a Range Rover with the bold horizontal graphic that is created by the perforated two-bar grille and distinctive headlamps.

Superbly designed. Carefully created by Land Rover designers to give more opportunity for individual expression and to make every journey more personal. It is the true Range Rover experience on a compact scale.

The striking exterior design conveys an immediate sense of luxury with its precision build quality and the use of eye-catching metallic finishers. There are sophisticated details such as the vents on the bonnet* and at the side of the vehicle, as well as the jewel-like characteristics of the front and rear lamps with their LED signature lighting* and the tapering blade indicator clusters.

Range Rover Evoque's advanced lighting technology achieves outstanding performance as well as providing some of the vehicle's most striking signature design elements. The innovative LED lighting systems are used to create the unique graphics of the front daytime running lights and complex 3D 'petal' design in the rear lamps.

*Certain models only.

Vehicle shown: Range Rover Evoque Dynamic in Mauritius Blue.

Available in two distinct body styles. Range Rover Evoque and Range Rover Evoque Coupé.

RANGE ROVER EVOQUE

The five-door version, with its breathtaking contemporary kinetic design and superb accessibility to suit specific lifestyle needs.

RANGE ROVER EVOQUE COUPÉ

The compact premium crossover, with its sleek individualistic design. A new interpretation of classic Range Rover design cues with a dynamic profile and powerful stance.

ALL CONDITIONS

Like every Land Rover vehicle, Range Rover Evoque optimises performance and capability in all on and off-road conditions. It does this by employing a suite of innovative technologies including Terrain Response®*, which adapts Range Rover Evoque's engine, transmission and electronic systems to maximise drivability, comfort and traction.

Range Rover Evoque masters all surfaces and all weathers, using legendary Land Rover all-terrain technologies. It is smaller, lighter – the most efficient Range Rover... ever. A true Range Rover in compact form.

There are four Terrain Response® settings: General Driving, Grass/Gravel/Snow, Mud & Ruts and Sand. A fifth Dynamic setting is added when Adaptive Dynamics is specified.

-  GENERAL DRIVING
-  GRASS/GRAVEL/SNOW
-  MUD & RUTS
-  SAND

*Not available with 2WD.

Vehicle shown: Range Rover Evoque Prestige in Firenze Red.

Cutting-edge technologies include: Land Rover patented Hill Descent Control (HDC®)* which assists with controlled descents of difficult slopes by maintaining a desired speed and applying braking separately to each wheel; Gradient Release Control (GRC)* which is designed to prevent the vehicle 'running away' on a steep incline when the driver releases the brake; and Hill Start Assist which is designed to prevent roll back after a hill start.

There is also Dynamic Stability Control (DSC). Designed to correct over and under-steer, DSC interacts with the engine and brakes to help maintain stability. Electronic Traction Control (ETC) senses when wheel slip is occurring and uses the braking system to minimise wheel spin. Roll Stability Control (RSC) detects critical levels of roll and applies braking to increase the turn radius to help reduce the likelihood of a rollover.

Night-time driving is further enhanced with the optional availability of adaptive xenon headlamps. These headlamps have a feature to provide added illumination in tight bends and can be upgraded with optional Automatic High Beam Assist which detects light from oncoming traffic and switches automatically between high and dipped beams as appropriate.

PERFORMANCE

With its lightweight and more compact footprint, Range Rover Evoque offers the enthusiast driver quicker responses and greater agility. Available on Prestige and Dynamic models, Adaptive Dynamics with advanced MagneRide™ monitors vehicle movements at least 1,000 times per second. It reacts to driver or road inputs to give greater control and minimise body roll, adding to the feeling of engagement and the sense of a taut, sporting ride. The system will even sense off-road conditions, and optimise damping accordingly.

Range Rover Evoque features the latest in power assisted steering technology. Electric Power Assisted Steering (EPAS) is designed to deliver accurate, consistent steering and agile cornering. Power assistance is speed-sensitive for lightness and responsiveness at low speeds and increased firmness at higher speeds. EPAS is also more efficient when compared with a conventional power steering system.

1,000 TIMES PER SECOND

129

g/km

eD4 TURBO DIESEL ENGINE (TWO-WHEEL DRIVE)

The 2.2 litre turbo diesel is available as an eD4 (150hp) two-wheel drive version which shares the TD4 and SD4 characteristics yet delivers CO₂ emissions of 129g/km for Range Rover Evoque Coupé and 133g/km for Range Rover Evoque. The eD4 also features an intelligent Stop/Start system which works by automatically shutting down the engine when it is not required, for instance at traffic lights, then re-starts the engine as soon as the clutch is released.

TD4 AND SD4 TURBO DIESEL ENGINES (FOUR-WHEEL DRIVE)

The 2.2 litre turbo diesel is also available in two four-wheel drive forms TD4 (150hp) and SD4 (190hp), and delivers superb torque, responsive performance and impressive refinement. The engine provides power on demand, a very broad torque curve. SD4 engines can be specified with either six-speed automatic or six-speed manual transmissions. TD4 is available with six-speed manual transmission only. Vehicles with the manual transmission also feature the intelligent Stop/Start system to help reduce the fuel consumption by up to a further eight percent.

2.0 LITRE Si4 PETROL ENGINE (FOUR-WHEEL DRIVE)

The Si4 petrol engine is a 2.0 litre all-aluminium power unit featuring the latest direct-injection technology, advanced turbocharging and twin independent variable valve timing to help lower fuel consumption and reduce CO₂ emissions to 199g/km. The engine is fitted with a six-speed automatic transmission that has been engineered to improve fuel economy and features Drive Select, an advanced rotary gearshift with steering wheel mounted paddle controls to enhance the sporty driving experience. It also delivers a rich, powerful engine sound during acceleration.

To reduce fuel consumption all engines also feature Smart Regenerative Charging, which charges the battery when it is most economical to do so by capturing wasted kinetic energy as the vehicle decelerates.

INTERIOR

SPORTS COMMAND DRIVING POSITION

Range Rover Evoque introduces the new Sports Command Driving Position which offers a new take on the feeling of control and command that is an integral feature of every Land Rover vehicle. The driver sits lower, 'in' the vehicle, cocooned by the interior with all important information clearly visible and all controls easy to reach. The result is a drive that is sportier than ever while retaining the legendary view of the road ahead and the surrounding environment.

LUXURY FINISHES

The same ethos of luxury, quality and attention to detail that goes into every other, larger Range Rover. The same ethos is behind the materials: the fine leathers, the authentic metal and real wood finishers, and innovative recycled materials. Whichever Range Rover Evoque you choose, it's a true Range Rover.

Depending on your choice of Range Rover Evoque model, there are two grades of high quality leather available, including premium Oxford leather with its beautifully soft, high-grade hides which have been specially selected for their tactility and appearance.

The finest twin-needle stitching also features on Range Rover Evoque. From its length and direction, to its colour and the excellence of the thread and even the size and shape of the needle: it all guarantees the highest quality finish. The luxury in Range Rover Evoque also extends to the rear accommodation which provides excellent passenger ergonomics and a spacious environment designed for relaxation and long-distance comfort. Range Rover Evoque Coupé also provides a choice between a rear bench seat and more sports orientated twin rear seats.

Carefully selected materials help to ensure that all occupants enjoy a low-allergy environment.

LIGHTING

Even as the driver activates the remote key fob to unlock Range Rover Evoque, the vehicle stirs, illuminating puddle lamps that project the unique 'Range Rover' signature graphic onto the ground*.

Range Rover Evoque can be enhanced with optional ambient interior LED mood lighting. This can be configured to suit personal tastes with a choice of five colours and a variety of brightness settings. To add a real sense of occasion automatic colour changes are activated when the driver chooses the Dynamic setting on Terrain Response®, changing the ambient lighting to red**.

**Only available with Adaptive Dynamics.

INTERIOR TECHNOLOGIES

Range Rover Evoque's interior features a suite of the latest technologies to provide driver and passengers with the most comfortable, most enjoyable experience possible.

All driver displays present clear, useful information. The centrepiece of the vehicle and the hub for controls and Infotainment is the eight inch colour Touch-screen in the centre of the fascia. This provides the latest in technology with exceptionally clear graphics. The availability of a dual view functionality* with the Touch-screen allows the driver and front seat passenger to watch separate images simultaneously on the same screen.

Also available is a highly intuitive, powerful voice control system that includes the latest 'Say What You See'* technology, which provides the user with convenient visual prompts on the Touch-screen.

The steering wheel houses controls for convenience features that are standard on Range Rover Evoque. These include cruise control and primary audio controls to maximise ease-of-use of the Infotainment systems and Driver Information Display.

The Driver Information Display's five inch full colour screen supplements the eight inch Touch-screen. It is conveniently located, directly under the driver's forward line of sight between the two instrument dials, and presents primary vehicle information such as temperature and fuel levels, Terrain Response® settings as well as turn-by-turn navigation information*.

The Hard Disk Drive (HDD) premium navigation system* allows features to be accessed more quickly – for instance, route finder and route recalculation times are significantly reduced – helping minimise delays in determining directions for the driver. The system includes an 'eco' feature, which is designed to show the most fuel-efficient route to your destination.

The Infotainment system can also play MPEG4 Video Files[†] stored on a USB device plugged into a USB port located in the vehicle. Analogue/digital television channels can be watched on the front seat passenger display[‡].

Range Rover Evoque's rear seat entertainment system* has the ability to play high quality DVD Video as well as the television channels and route it through the eight inch screens located in the back of the front headrests as well as to the front seat passenger's display on the Touch-screen*. Every rear seat entertainment system comes with a Touch-screen remote control, which allows intuitive and user friendly operation. Two wireless digital headphones featuring WhiteFire® technology provide high quality sound and clarity to occupants using the rear seat entertainment system.

*Optional feature.

‡Not available on 2WD.

†Please contact your Land Rover Dealership for detailed file compatibility information.

‡Requires the optional hybrid television feature.

Please note: The Voice System has been designed to recognise a number of languages. However, Land Rover cannot guarantee that the system will be compatible with every accent group within those languages. Please speak to your Land Rover Dealership about testing the Voice System for compatibility with a particular accent group.

WhiteFire® is a registered trademark of Unwired Technology LLC and any use of such marks by Land Rover is under licence.

AUDIO

Range Rover Evoque is packed with clever, relevant technology including state-of-the-art connectivity. This includes Bluetooth® for both hands free connection; with a compatible mobile phone and audio streaming for the enjoyment of personal music from a portable Bluetooth® device via the audio system. Essential connectivity for iPod®, MP3 and USB devices is also provided via direct inputs.

All audio options on Range Rover Evoque achieve the highest possible sound quality with a choice of in-car entertainment systems available. They offer unsurpassed performance and enjoyment for driver and passengers alike.

By working with Meridian™, a world leader in audio technologies and digital sound processing, Land Rover has also developed a choice of advanced audio systems to delight the most discerning music fans.

The 380W Meridian Sound System features 12 channels and 11 loudspeakers including a dual-channel subwoofer. The optional Meridian Surround Sound System produces an incredible 825W through 15 channels and 17 loudspeakers including a subwoofer. Meridian systems offer unique technologies that provide superior audio performance within the confined space of a vehicle. Digital Signal Processing (DSP), for instance, allows a speaker to perform with the characteristics of a speaker of eight times the physical volume.

The result is the very best in world-class audio reproduction with sound that is real and totally convincing...it's just as the artist intended. Also pioneered by Meridian is Trifield technology which ensures a perfect stereo image for each occupant, producing an holistic sound within the cabin to further improve the concert-like experience. A special feature, Dynamic Volume, detects variations in the cabin and balances out the sound quality so that it's consistent throughout the car.

TECHNOLOGY

Park Assist. This optional, advanced automated technology appears for the first time on a Range Rover. Helping the driver to parallel park in tight parking spots (as little as 1.2 times the length of the vehicle), Range Rover Evoque uses ultrasonic sensors to steer while the driver operates the foot pedals. Real time information is also displayed on the Driver Information Display to aid the driver through each stage of the manoeuvre.

The optional surround camera system utilises five discreetly placed digital cameras to relay an almost 360 degree view around the vehicle to the eight inch Touch-screen display on the fascia. The system provides a number of driver-assist features and can be invaluable when manoeuvring on and off-road. The five digital cameras are housed around the exterior of the car – two at the front, one on either side of the vehicle and one at the rear.

Tow Assist, part of the surround camera system, is a next generation reversing aid that predicts the rearward trajectory of both vehicle and trailer. This helps the driver perform more accurate manoeuvres and is selected from the Touch-screen menu. Wide-view cameras on the vehicle give a clear field of vision; guidelines are superimposed over the resulting image to highlight the predicted reversing path for the vehicle and trailer.

Blind spot monitoring is also available. This system uses side-mounted radars to warn of vehicles in the driver's blind spot. A bright amber warning icon is illuminated in the appropriate door mirror when a hazard is identified.

Rear park aid. This convenient feature is standard on Range Rover Evoque. Other optional advanced driver technologies and convenient features include front park aid, a rear camera system, as well as powered electric tailgate and keyless entry.

SAFETY AND SUSTAINABILITY

Starting at just 1,595kg and using a range of advanced materials, Range Rover Evoque is the lightest and most efficient Range Rover ever. Key components throughout the vehicle, including an aluminium bonnet and roof and a magnesium cross car beam, enhance the vehicle's sustainability credentials and help improve fuel economy as well as providing strength.

Range Rover Evoque was awarded a maximum five-star rating in the prestigious Euro NCAP safety tests. The front fenders and tailgate assembly are constructed from composite materials – materials made from two, or more, distinct substances whose differing properties (lightness and strength, for example) complement one another. Even the thickness of the acoustically laminated windscreen is reduced to save weight and improve fuel efficiency, performance and handling without compromising strength and safety.

CHOICES

You're already making a statement with your Range Rover Evoque. Now you can express your individuality even more by choosing from the stunning ranges of luxury options, colours, wheels, trim and finishers.

Vehicles shown from left:

Please note: When choosing vehicles fitted with specific wheel and tyre combinations or optional wheels and tyres, your intended use of the vehicle should be considered. Wheels with larger diameters and lower profile tyres may offer certain styling or driving benefits, but may be more vulnerable to damage. Please discuss your requirements with your Land Rover Dealership. For further details on tyre efficiency as required by EU legislation please speak to your Land Rover Dealership.

INTERIOR FINISHERS AND TRIM OPTIONS

The solidity and substantiality of real metal. Authentic aluminium finishers are used on every Range Rover Evoque. Each piece goes through more than twenty distinct processes resulting in exquisitely crafted detailing of superior quality with that telltale cold touch.

And while the use of traditional materials is reinvented with new imagination and creativity, Range Rover Evoque also innovates with the latest recycled materials. The use of materials that are recycled, as well as exuding luxury and quality, is an integral part of the Range Rover Evoque 'philosophy'.

In fact, 16kg of premium recycled materials make a significant contribution to Range Rover Evoque. That's the equivalent of reusing one thousand 500ml plastic bottles. A further 21kg of natural materials are used in the vehicle, including leather for the seat covers, instrument panel and door casings.

LAND ROVER FINANCE Land Rover finance offers a wide range of competitive finance and insurance plans, developed exclusively for Land Rover owners and tailored to meet all your individual requirements*. With Land Rover Finance you are dealing with people who have a close working relationship with your local Dealership and who are as passionate about Land Rover as you are. Your Land Rover Dealership will match your personal or business requirements to the most appropriate finance plan, provide you with quotations and process your application.

WARRANTY Every new Land Rover supplied by Land Rover UK comes with a standard three year unlimited mileage warranty. Please apply to your Dealership at the time of purchase for full details of the manufacturer's terms and conditions.

*Finance is subject to status and conditions. Available to over 18's in the UK only. Guarantees/indemnities may be required. Certain categories of business user may be excluded.

IMPORTANT NOTICE: Land Rover is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up to date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and Dealerships are not agents of Land Rover by any express or implied undertaking or representation.

All Land Rover Approved Accessories fitted by a Land Rover Dealership within one month or 1,000 miles/1,600 kilometres (which ever occurs first) of the handover of a new registered vehicle will benefit from the same warranty terms and period of cover as the vehicle warranty. Accessories purchased outside of these parameters will be subject to a 12 month unlimited mileage warranty. All Land Rover Approved Accessories are rigorously tested to the same exacting standards as those applied to our vehicles. Performance in extreme hot and cold temperatures, corrosion resistance, impact and airbag deployment highlight some of the exhaustive product testing carried out to ensure accessories are both durable and importantly, continue to comply with current legislation.

All our accessories are designed to be an integral part of Land Rover vehicles. While many items such as roof carriers are simple to fit, some products require specialist tools and diagnostic equipment to ensure correct integration with the vehicle structure and electrical systems. These products vary from market to market, please consult your Land Rover Dealership who will be pleased to advise you on current specifications and any query you may have.

The colours reproduced here are subject to the limitations of the printing process and may therefore vary slightly from the actual vehicle. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your Land Rover Dealership. Distributors and Dealerships are not agents of Land Rover and have absolutely no authority to bind Land Rover to any express or implied undertaking or representation.
