ŠKODA

# The ŠKODA Superb

Effective: April 2013

## Welcome to the Superb Hatch and Estate

The Superb is a car with history dating from the 1930s. The original Superb's design was luxurious and elegant both inside and out, built to appeal to the world's leaders and royalty. Superb takes its sumptuous design cues from its earliest predecessor and builds on these strengths.

The ŠKODA design philosophy is to produce cars offering the best of both worlds - world class engines, smooth transmissions and high specifications, wrapped in distinctive, elegant and practical bodies.

The Superb takes this philosophy and develops it. It's the first car ever to have a boot which can be opened as a hatch or a saloon. It has more rear legroom than many prestige chauffeur cars, and some nifty technological advances such as AFS (adaptive front light system), touch screen technology and park assist.

Now, building on the considerable strengths of the award winning hatchback the Superb Estate is the largest and most luxurious car to ever wear the ŠKODA badge.

So now the introduction is over, why not have a look at the Superb in a little more detail?

The Superb featured in this brochure is only available from stock, as it is soon to be moving aside to make way for the facelift Superb. Details will be announced shortly on this model.

## ŠKODA Superb Estate key features

**Luggage compartment lighting.** The boot of the Superb Estate contains some thoughtful features to make life a little easier. Two fixed lights on the inside of the tailgate illuminate the inside of the boot when open, whilst the parcel shelf retracts when touched, so you can load bags without having to put them down.

**Electrically controlled fifth door.** The Superb Estate is available with an optional electrically operated boot. At the touch of a button - either beside the gearstick, on the key fob (press and hold for 2 seconds) or on the boot itself, the boot will open automatically.

When you have finished loading, press the button on the inside of the tailgate and the boot will close. This system has a clever feature for when you may park somewhere with a low ceiling - the height of the boot opening can be pre-set so you don't have to worry about any unwanted scrapes and dents.

### **Partition system.**

The Superb Estate features a very functional partition and tether system (standard on SE, Elegance and Laurin & Klement). Two aluminium plates run the length of the boot and have an extendable bar to keep large items in place with a tether system to keep smaller items stowed to one side. Both the bar and tether system are removable.

**Handy light.** A handy LED light positioned on the inside of the boot, illuminates the large luggage area when the tailgate is opened. The light can also be removed and used as a torch. It has a magnetic back so that it can be attached in any position on the car in case you ever need to light a specific area in the dark.

## ŠKODA Superb Hatch key features

### Incredible space.

The Superb has an enormous 595 litres of usable space in the boot. With the seats down, the Superb offers an astonishing 1,700 litres of space. Passengers benefit from enormous amounts of legroom, more than even an S Class Mercedes.

**Park assist.** Optional on Superb SE, SE Plus and Elegance, standard on Laurin & Klement. Park assist is an innovative system that uses a set of ultrasonic sensors placed at various points around the car to judge the suitability of parking space before assisting in the parking manoeuvre itself.

**Twindoor (Hatch only).** Twindoor is ŠKODA's revolutionary boot opening mechanism which allows the boot to be opened in two different ways; as a hatch or as a saloon at the simplest touch of a button. This gives you great versatility and more practicality compared to a standard hatchback or saloon car.

### Touchscreen Technology.

There are three touchscreen systems available on Superb; the 'Bolero' with integrated 6 CD changer and SD card reader (standard on SE) and the 'Columbus' or 'Amundsen' satellite navigation units with a 30Gb hard drive and SD card reader ('Amundsen' is standard on SE Plus whilst 'Columbus' is standard on Elegance, Laurin & Klement and optional on SE). Each of these systems reduce the physical number of buttons on the dashboard, using an innovative and easy to follow interface. They allow the driver to control features within the car, as well as displaying information regarding the vehicle such as parking sensors, heated seats and external temperature etc.

## ŠKODA GreenLine II Technology

As the world becomes more environmentally sensitive, ŠKODA has responded by developing GreenLine II technology. The following information will explain the key technological features of GreenLine II and how they contribute to making a cleaner, greener customer experience, as well as reducing fuel costs for the driver and our impact on the environment. GreenLine II is available on Superb S, SE, SE Plus and Elegance.

**1.6 TDI CR 105PS DPF.** The economical four cylinder 1.6 TDI diesel engine in the GreenLine II produces just 114g/km CO<sub>2</sub> which means a VED band of C, which is £0 road tax for the first 12 months.

The Superb GreenLine II has an excellent combined fuel economy of 64.2 mpg.

**Energy Recovery.** Energy recovery is the process of converting kinetic energy (energy created through movement) back into usable electricity, which is either stored in the battery, or immediately used again by electrical components on the vehicle.

Depending on driving style, electrical energy is supplied to the vehicle by the alternator or directly by the battery. The principle of energy recovery is to reduce the load on the engine and therefore contribute to lower emissions and reduced fuel consumption.

**Aerodynamics.** One of the simplest ways to improve fuel efficiency and reduce emissions, is to create a more aerodynamic vehicle.

The Superb GreenLine II has a small rear boot spoiler (Hatch only) and slightly lowered suspension to facilitate better airflow.

To keep the weight and drag of the GreenLine II models down to a minimum and thus ensure the model is as efficient as possible, there is a reduced list of options available.

However, the comfort and safety of all occupants has not been compromised and so important features like airbags and air conditioning have been retained.

**Low rolling resistance tyres.** The Superb GreenLine II has 16" Spectrum Alloys (205/55 R16 91H) these lighter alloy wheels with low rolling resistance tyres have a higher prescribed air pressure to reduce friction.

**Stop/start System.** This innovative system turns off the engine when it is not needed, for example when the driver is stopped at traffic lights or in heavy traffic.

When a normal car is stationary, the engine will idle, which in turn consumes fuel and generates emissions. The Stop/start system cleverly cuts out this unnecessary work by stopping the engine automatically when the car is stationary, in neutral and the clutch pedal is released.

The Stop/start system does not inhibit a quick getaway either. As soon as the driver presses the clutch to put the vehicle in gear, the engine immediately starts up so acceleration is as instant as if the car had been idling.

**Gear recommendations.** The recommended gear feature on the trip computer or Maxi-dot display shows the driver whether the gear they are in is appropriate or whether they need to change up or down.

The aim is to help the driver achieve optimum engine speed and reduce fuel consumption.

The optional equipment list on Superb GreenLine II is the same as the corresponding trim level, with some exceptions. Due to weight and power restrictions some options are unavailable on GreenLine II. Please see page 22-23 for availability information.

### OTR (Recommended On The Road)

\* Recommended 'On the Road' prices include delivery, 12 months Road Fund Licence, DVLA First registration Fee (at £55), and apply to the United Kingdom only.

### VED (Vehicle Excise Duty)

\*\* All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO<sub>2</sub>) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO<sub>2</sub> figures may differ on these vehicles if taken from current ŠKODA UK stock. The VED bands are shown in the table opposite.

<sup>1</sup>First year vehicle licence rates for petrol and diesel cars purchased on or after 1st April 2013. First year rate or 'showroom tax' applies to new car purchases only.

<sup>2</sup>Rate reverts to the Government's applicable Standard VED rate in subsequent years.

Please confirm figures with your ŠKODA retailer. Edition: UK 1st April 2013. VAT is calculated at 20%. For fuel consumption data, please refer to page 28.

Company car tax is based on your cars carbon dioxide emissions. The higher the car's emissions, the higher its tax liability. When a company car is made available for private use a 'Benefit in Kind' value is calculated for tax purposes.

To help you work out your tax liability please refer to page 34.

### P11D (Expenses and Benefits)

The P11D value is calculated by taking the On The Road (OTR) price for the vehicle, less the Road Fund Licence (RFL) and First Registration Fee (FRF).

BiK (Benefit in Kind)  
The BiK percentage value is based on the CO<sub>2</sub> emissions of the vehicle for the current tax year 2013/2014.

**OTR (Recommended On The Road)**  
 \* Recommended 'On the Road' prices include delivery, 12 months Road Fund Licence, DVLA First registration Fee (at £55), and apply to the United Kingdom only.

**VED (Vehicle Excise Duty)**  
 \*\* All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO<sub>2</sub>) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO<sub>2</sub> figures may differ on these vehicles if taken from current ŠKODA UK stock. The VED bands are shown in the table opposite.

<sup>1</sup>First year vehicle licence rates for petrol and diesel cars purchased on or after 1st April 2013. First year rate or 'showroom tax' applies to new car purchases only.  
<sup>2</sup>Rate reverts to the Government's applicable Standard VED rate in subsequent years.

Please confirm figures with your ŠKODA retailer. Edition: UK 1st April 2013. VAT is calculated at 20%. For fuel consumption data, please refer to page 28.

Company car tax is based on your cars carbon dioxide emissions. The higher the car's emissions, the higher its tax liability. When a company car is made available for private use a 'Benefit in Kind' value is calculated for tax purposes.

To help you work out your tax liability please refer to page 34.

### P11D (Expenses and Benefits)

The P11D value is calculated by taking the On The Road (OTR) price for the vehicle, less the Road Fund Licence (RFL) and First Registration Fee (FRF).

BIK (Benefit in Kind)  
 The BIK percentage value is based on the CO<sub>2</sub> emissions of the vehicle for the current tax year 2013/2014.

K	201 - 225	£620	£280
L	226 - 255	£840	£475
M	Over 255	£1,065	£490

### OTR (Recommended On The Road)

\* Recommended 'On the Road' prices include delivery, 12 months Road Fund Licence, DVLA First registration Fee (at £55), and apply to the United Kingdom only.

### VED (Vehicle Excise Duty)

\*\* All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO<sub>2</sub>) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO<sub>2</sub> figures may differ on these vehicles if taken from current ŠKODA UK stock. The VED bands are shown in the table opposite.

<sup>1</sup>First year vehicle licence rates for petrol and diesel cars purchased on or after 1st April 2013. First year rate or 'showroom tax' applies to new car purchases only.

<sup>2</sup>Rate reverts to the Government's applicable Standard VED rate in subsequent years.

Please confirm figures with your ŠKODA retailer. Edition: UK 1st April 2013. VAT is calculated at 20%. For fuel consumption data, please refer to page 28.

Company car tax is based on your car's carbon dioxide emissions. The higher the car's emissions, the higher its tax liability. When a company car is made available for private use a 'Benefit in Kind' value is calculated for tax purposes.

To help you work out your tax liability please refer to page 34.

### P11D (Expenses and Benefits)

The P11D value is calculated by taking the On The Road (OTR) price for the vehicle, less the Road Fund Licence (RFL) and First Registration Fee (FRF).

BIK (Benefit in Kind)  
The BIK percentage value is based on the CO<sub>2</sub> emissions of the vehicle for the current tax year 2013/2014.

☐ Where law permits.

## Power transmission

**Clutch** Hydraulically-activated single-plate dry clutch with diaphragm spring, asbestos-free coating.

**Manual transmission** Five-speed manual transmission, fully synchronised with direct gearshift, six speed manual transmission.

**6 spd DSG transmission** - two coaxial wet multiple-disc clutch, electro-hydraulically operated.

**7 spd DSG transmission** - two coaxial dry multiple-disc clutch, electro-hydraulically operated.

**Please note:** With all manual gear boxes the clutch needs to be depressed to start the engine.

## Number of gears

5 Speed Manual 1.6 TDI, 1.6 TDI GreenLine II  
6 Speed Manual 1.4 TSI,1.8 TSI, 1.8 TSI 4x4, 2.0 TDI 140PS, 2.0 TDI 170PS, 2.0 TDI 170PS 4x4

6 Speed DSG 2.0TFSI 200PS DSG, 3.6 V6 4x4 DSG, 2.0 TDI 140PS DSG, 2.0 TDI 140PS 4x4 DSG, 2.0 TDI 170PS DSG

7 Speed DSG 1.8 TSI DSG

## Chassis

**Front axle/rear axle** - McPherson suspension with lower triangular links and torsion stabiliser/multi-element axle, with one longitudinal and three transverse links, with torsion stabiliser.

**Braking system** - hydraulic dual diagonal circuit braking system vacuum assisted with Dual Rate system.

**Front brakes** - Disc brakes with inner cooling, with single/piston floating caliper.

**Rear brakes** Disc brakes.

**Handbrake** Mechanical handbrake operating on rear wheels.

**Steering** - Direct rack and pinion steering with electromechanical power steering.

**Turning circle** (m) 10.8m.

☐ Where law permits.

## Tank

**Fuel tank content** - 60 litres

**Fuel** - Lead-free petrol with RON 95 or Lead-free petrol with RON 91†

**Body type** - 5door, two compartment, 5 seater

## Drag coefficient Hatch

Cw 0.30 (0.29 GreenLine II)

## Drag coefficient Estate

Cw 0.31 (0.29 GreenLine II)

## CR - Common Rail

Official fuel consumption for the Superb range in mpg (litres/100km):

**urban** 19.2 (14.7) - 52.3 (5.4);  
**extra urban** 36.2 (7.8) - 74.3 (3.8);  
**combined** 27.7 (10.2) - 64.2 (4.4).  
**CO<sub>2</sub> range** 237 - 114 g/km

† Lower efficiency when using lower RON petrol.

We measure the maximum power output figures of our engines in PS or Pferdestärke (horse strength in German), which is the metric equivalent of bhp. To convert from metric to imperial horsepower, divide the PS figure by 1.0139.

\* Fuel consumption and CO<sub>2</sub> figures are obtained under standardised EU test conditions (Directive 93/116/EEC). This allows a direct comparison between different manufacturer models but may not represent the actual fuel consumption achieved in 'real world' driving conditions. More information is available on the Škoda website at www.skoda.co.uk and at www.vca.gov.org

## Measurements and Weights

## Owning a ŠKODA

We make sure it's easy, fun, and stress-free.

ŠKODA customer service is officially award-winning. We have been voted Number 1 in the 2012 Driver Power survey for the fourth year running.

### Network capability

You can enjoy our award-winning customer service through our network of around 165 Authorised Repairers.

As a ŠKODA customer, you will be looked after by your retailer from the moment you walk through the door and throughout the life of your ŠKODA. Your Superb will be serviced and maintained to the highest standards by specially trained ŠKODA technicians. And when you need a spare part, you'll be happy to know that most are held in stock, or can be ordered within 24 hours.

The ŠKODA Customer Promise is a commitment from our retailers to offer:

- > Care and consideration for you and your car
- > A flexible and convenient service
- > Expertise and attention to detail
- > A clear explanation of our work

### Roadside Assistance

A three year, European-wide, unlimited mileage ŠKODA Assistance policy comes free of charge with every new ŠKODA provided by the RAC through a dedicated team.

Provided through the RAC, there's a team of specially trained Technicians carrying the right diagnostic equipment and parts to get you back on the road as quickly as possible in the unfortunate event of a breakdown. They'll even help you if you fill up with the wrong fuel, lose your car keys, or get a puncture.

### Warranty

When you buy your new ŠKODA through our authorised retailer network, it is automatically covered by a three year, 60,000 mile manufacturer's warranty.

There's no mileage limit on the warranty in the first two years and for additional peace of mind there's a 12 year body protection warranty.

You can even extend your warranty to four or five years, see the option page for prices and page 35 for further details.

Warranty cover from new			
First 2 years	First 3 years	4-5 years	Up to 12 years
Unlimited mileage	3 years or 60,000 miles, whichever is sooner	Optional Extended Warranty	Body Protection Warranty

### Further information

You can find lots of additional information about owning a ŠKODA on our website at [www.skoda.co.uk](http://www.skoda.co.uk). Our retailers are always happy to help with any questions, backed up our dedicated Customer Service Centre. We look forward to hearing from you soon.

Call: 08457 745 745  
Email: [customerservices@skoda.co.uk](mailto:customerservices@skoda.co.uk)  
Open 8.30am - 5.30pm

## Technical glossary

**ABS**: the anti-lock braking system prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable. When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the system reduces brake pressure to that wheel.

**Elements of the ABS System** :-

• **Dual Rate Vacuum Brake Boosters**: increases brake effort under emergency braking conditions.

• **EBC**: Electronic brake control. The engine brake torque control regulates the power supply by intervening with the engine management system.

• **EBD** (aka EBV): Electronic Brake Distribution automatically distributes different pressures to the front and rear brakes to stop the rear wheels from locking up under heavy braking. It also compensates for loaded and unloaded vehicles therefore doing away with the need for a Load Sensing Valve on the rear axle.

**CAN Bus**: the CAN Bus is an electronic data bus which links the various different electronic control systems in the car. It ensures ideal co-ordination between systems and reduces the amount of wiring needed in the car.

**Fuel cut-out**: should one or more of the airbags inflate after an accident, this system automatically cuts out the fuel supply, thus preventing subsequent leakage of the diesel or petrol.

**Trip Computer**: the trip computer not only features an impressive range of data displays, operating it is simplicity itself. A multifunction touch key enables you to call up all relevant data on the easy-to-read display. Features include external temperature, time, current fuel consumption, average fuel consumption, miles driven and average speed.

**DPF**: diesel particulate filter is part of the exhaust system responsible for cleaning the engine exhaust gases before they enter the atmosphere. The DPF catches soot particles emitted in the exhaust gas and it works in conjunction with the catalytic converter, which reduces the amount of harmful gases entering the atmosphere. The DPF must periodically be emptied of the soot particles, a process known as regeneration. This involves elevated exhaust system temperatures. A driving style is required during regeneration, where a constant vehicle speed above 37 mph must be maintained. This does not always suit customers who make frequent short journeys or experience stop/start driving or drive within inner-city or urban areas.

**CR**: the completely new range of diesel engines are built on a system of Common-Rail fuel injection. The diesel engines have a high-pressure common rail direct injection fuel system and four-valve technology. As a result, the new engines are much quieter, more refined in their operation and consume less fuel, compared to the Pump Duse engines and significantly reduce emissions.

**ESC**: electronic stability control is designed to stabilise the dynamic handling response of the vehicle by counteracting any tendency towards oversteer or understeer. The ESC constantly compares the actual movement of the vehicle with predetermined values and according to the situation ESC reacts by braking each wheel individually (according to direction of slip) and automatically adjusting the engine’s output.

**Elements of ESC system**:-

• **ASR**: anti-slip regulation traction control ensures the Superb’s stability when pulling away or accelerating. If the engine power or torque being transmitted to the drive wheels is too great, for example on a slippery road surface, engine torque is automatically reduced until optimum road holding returns, thus preventing wheelspin. A light indicates whether the ASR system is on. It can be manually switched off.

• **MSR**: the engine torque control system recognises when the wheels are subject to too much slippage and regulates the power supply by intervening in the engine management system. This prevents wheelspin when, for example, changing down on a smooth or wet road surface. MSR is a constituent part of the ASR system.

• **EDL**: the electronic differential lock continually compares the rpm of the drive wheels, and if it identifies a difference between them which could lead to an individual wheel spinning, for example if the two wheels are on different types of surface or accelerating on wet leaves, the system brakes the wheel affected until uniform rpm of all drive wheels is restored.

• **HBA**: Hydraulic brake assistant increases the optimal build-up of brake power. It ensures complete use of the brake system potential, thus shortening the braking distance.

• **HHC**: Hill hold control allows for a safe hill start by holding the brake for a small amount of time, reducing the risk of unintentional reversing or roll back.

• **TPM**: Draws the driver’s attention to any pressure loss in any of the tyres. Early warning can prevent damage from occurring as a result of an under inflated tyre or a defect that radically changes the cars behaviour and driveability.

• **DSR**: Driver Steering Recommendation – in a crisis situation it helps the driver stabilize a skid by making a slight intervention in the steering.

• **ESBS**: Electronic Stability Brake System – targeted interventions in the braking process improve the handling of a car as it brakes when passing round a bend and keeps it from veering.

• **AFM**: records and assesses all available data about the journey to optimize the ESC system’s reactions, which can thus be adapted to any driving style and the current vehicle payload.

• **Xenon lights**: the Xenon lights produce about 2.5 times the light of standard Halogen lights with 35% less energy consumption.

## Extended Warranty

**Exclusions and limitations**

Wear and tear components will only be considered under the terms of the warranty for the first of six months or 6,500 miles, whichever is soonest. These include, but are not limited to brake linings and disc pads, clutch release bearings, clutch pressure plates and centre plates, tyres, wiper blades, seat and backrest covers, floor coverings, spark plugs, batteries for key fobs and alarms, light bulbs and shock absorbers.

Mechanical adjustments including but not limited to adjustments to doors, flaps, boot lids, bonnets and sunroof, brake adjustment, clutch adjustment, v belt adjustment, ignition adjustment, headlight adjustment, steering geometry adjustments and wheel balancing are excluded.

**Damage (including but not limited to the following) is excluded:**

- Damage caused by your failure to take all reasonable steps to prevent mechanical damage from occurring.
- Damage or defects caused by not having the vehicle serviced in accordance with the manufacturer’s guidelines.
- Damage or defects caused by improper use of the vehicle, neglect or use of the vehicle for motor sports activities.
- Damage caused by an accident.
- Damage to paintwork or chrome caused by external influences, such as climatic, chemical or industrial pollution.
- Damage resulting from the use of non-original replacement parts.

Routine maintenance and servicing is not covered by the warranty. Incidental or consequential costs such as hotel charges, car hire, loss of personal effects or income are not recoverable under the terms of the warranty.

## Service Intervals

When you order your Superb, you can choose whether your car is on a fixed or a flexible service regime. Your retailer will help you decide which regime suits how your car will be driven, enabling your car to stay in the best possible shape.

Fixed regime: Service every 10,000 miles or one year (whichever comes first). This is recommended if the vehicle is likely to be used in the following way:

- Driven fewer than 10,000 miles per annum **and/or**
- Mainly short journeys, drive mostly in towns or cities **and/or**
- High vehicle loading/towing and frequent hill climbs **and/or**
- Heavy accelerating and braking, using high revs

Flexible regime: Sensors in the engine detect when a service is needed. You will be informed of this by a service light which will show at any point between 9,000 and 20,000 miles, up to 24 months (whichever comes first).

The flexible service regime is recommended for vehicles with a daily mileage of more than 25 miles where the vehicle is driven regularly and mainly at a constant speed with minimum vehicle and engine loading, minimal towing and driven in an economical manner.

## Motability

People in receipt of the Higher Mobility Component of the Disability Living Allowance receive special help from ŠKODA. Preferential prices on low cost Contract Hire are available through your local approved Motability retailer. For full details, contact your retailer.

## Calculating your tax liability

To find out how much tax you will pay, simply take the P11D value, then multiply this figure by the BiK percentage. Then simply multiply this figure by 20% or 40% depending on the level of income tax that you pay.

Please note if your employer provides you with free fuel, this is treated as an additional taxable benefit.

For more information on company car taxation please visit the HM revenue and customs website www.hmrc.gov.uk

<b>BiK calculation example- Superb S GreenLine II Hatch 1.6 TDI CR 105PS DPF</b>	
P11D value	£19,200.00
Company Car BiK tax based on CO <sub>2</sub> emission level	17%
Taxable BiK (for 2013/14 tax year): 17% of £19,200.00	£3,264.00

<b>Annual company car tax (2013/14)</b>	
20% Income Tax: 20% of £3,264.00	£652.80
40% income Tax: 40% of £3,264.00	£1,305.60

<b>Monthly company car tax (2013/14)</b>	
20% Income Tax: £652.80 divide by 12 months	£54.40
40% income Tax: £1,305.60 divide by 12 months	£108.80
